DIRECTIONS

SOIL, COCO AND SOILLESS MEDIA

Shake well before each use. Settling will occur naturally.

Mix 15-30 ml per gallon of water.*

- Use solution immediately after mixing.
- Will work with most drip irrigation systems. Flush drip lines with water after each use to avoid clogging.

Do not use this product undiluted or add directly to any concentrated fertilizer.

**These are general guidelines and may be adjusted as needed.*

STORAGE AND HANDLING

Store at room temperature. Avoid freezing. Agitate prior to use or transfer. Agitation is recommended every four weeks to prevent settling. This product is prone to expansion, periodic venting may be required to avoid leaking.

This product is suitable for organic production and meets the standards set by the National Organic Program (NOP).

NOTE: Store at room temperature. User assumes all risk when using this product. Not for human consumption. Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

GUARANTEED ANALYSIS:

Total Nitrogen (N).....2.0%
1.58% Other Water soluble Nitrogen
0.62% Water insoluble Nitrogen
Available Phosphate (P₂O₅).....2.0%
Soluble Potash (K₂O)..... 2.0%
Derived from fermented grain solubles

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:

Humic Acid.....0.5%
Derived from grain fermentation solubles
